EMPLOYMENT

System Admin   **Zingas Home Solutions**   **Jan. 2021 - Current**

- Collaborate with peers, business partners, and various support teams to provide continuous improvement.
- Use Salesforce reporting to ask questions and visualize data for the Sales, Marketing, and Operations department.
- Lead the development of internal applications such as an email signature generator and a complete mobile application that includes the org chart and QR codes for customers to scan and leave feedback for the company.

Freelance Developer   **Indy Tech Box**   **Jun. 2019 - Current**

- Collaborated personally with clients, and created/designed media reflective of their personal branding.
- Implemented UI/UX design principles to ensure seamless functionality and highest customer satisfaction.

Software Engineer   **Emit Band LLC.**   **Sept. 2020 - June 2021**

- Worked directly with the CEO and designer to brand and design the mobile app for the product.
- Worked with NFC technology to integrate the scanning features that the mobile app works off of.

PROJECTS - SEE PORTFOLIO SITE FOR INFO/DEMOS

- Reccurence.app. An easy to use, server driven UI application that makes it super simple to track recurring subscriptions. Built using *React, Redux, TailwindCSS, GraphQL, Node, Javascript*
- cocreatrlab. A collaborative platform for creative people to share tasks and collaborate on projects. Create your own community and share your tasks with others.

EDUCATION

Remote   **Butler University**   **Jan. 2020 - June 2020**

- Certification in Data Analytics and Front end Engineering
- 6 months and 1,000 hours of hands-on learning, programming, and building/testing web apps.
- Engaged in daily pair-programming and collaborative problem solving.
- Course material focused on React, JavaScript/TypeScript, Python, SQL/NoSQL, testing, and best practices.
- Graduated at the top of my class alongside the remaining 20% of the initial cohort.
